GERMAN DELEGATION

COCOM DOC. 3737

Paris, October 26, 1959

MEMORANDUM BY THE GERMAN DELEGATION
ON THE EXPORT TO HUNGARY OF BEARINGS

The German authorities refer to their Memorandum, Cocom Doc. 3590, and have the honour to inform the Committee that the request is modified as follows :

The Hungarian authorities intend to build several floating cranes for the restoration of destroyed bridges on the Danube and for clearing of this river. At present two cranes are under construction for which several bearings are needed. One set appears to have been ordered in Italy. The Committee has granted the necessary authorization on the request presented by the Italian Delegation in June 1959 (Cocom Doc. 3538).

The order addressed to German firms concerns the following bearings :

1 bearing type SKF 29 488,

valued at \$975,-

2 bearings type FAG 69 488,

total value \$2.150,-

All these three bearings are covered by item 1601. The inner diameter of these three bearings measures 440 mm.

The foregoing request replaces the request presented with Cocom Doc. 3590.

In view of the civilian end-use the German authorities intend to grant the license.

The German Delegation submit their request as an "ad hoc" case and would be grateful to hear the views of the Committee at an early opportunity.
